### Bases what you need to know:

#### Bases must:

- > Have a tolerance of no more than 5mm
- > Be flat, level and square
- > Have no run-off, unlike a driveway or patio, it should be flat
- > Be the exact size of the cabin

### Why having a level base is so important?

Having a level base is the perfect foundation for your cabin, it means that all the logs slot together without hitch, windows and doors will not catch or snag and all the logs will settle in unison over time.

We regret that if our fitters arrive and the base is not to the specifications above, we will have to leave site and return when it is acceptable. This will cause delays in the fitting of your building and could incur costs.
